

California OES Weather Threat Briefing

Saturday, May 29, 2021
9:00 AM PDT

Day 1 (Saturday): Elevated fire weather conditions persist over the southern California mountains with gusty winds and very dry conditions continuing. Minor to moderate heat risk will begin today across the Sacramento Valley. Isolated thunderstorms are possible of the Sierras this afternoon and evening.

WEATHER KEY POINTS

05/29/21 - 06/04/21

Saturday - Friday

- Mainly dry weather continues through the holiday weekend and into the middle of next week, with the exception of a few scattered thunderstorms over the Sierra on Saturday
- Hot temperatures likely to develop over much of the state Sunday through the middle of next week, with widespread 100 degree readings expected across the southern deserts as well as much of the Central Valley. Moderate to locally high heat risk is expected. Poor overnight recovery is also expected, especially Monday and Tuesday.
- Locally gusty winds of 25-40 mph and very dry conditions will produce elevated fire weather conditions each day, especially along mountain slopes
 - These winds may be strongest across the southern California mountains and deserts through the middle of next week
 - This also includes some breezy offshore winds expected in northern coastal areas and surrounding mountains Sunday through early in the week
